

Spring 1 in Falcons

This half term in Topic we have started learning about the World Around Us. We started our topic by learning about the different types of Megacities there are in the world. We learned that for a city to become a megacity, they need to exceed a population of 10,000,000 people. Tokyo is currently the largest megacity in the world.

We thought and debated about whether we'd like to live in the city. Some of us thought it would be a really good idea because there would be lots to do- others of us thought well actually the crime rate in cities and the pollution is a lot higher.

In English we did some work on a story based on Megacity and the Blue Umbrella. In this topic we did lots of work on setting descriptions and using different sentence openers. Part of our work was to describe a New York scene and then write about. We did a lot of narrative work where the theme was to focus on friendship and romance in a story.

In RE, we have been looking at a unit called Jesus the Light of the World. In this topic we had to think about how Jesus guides us and helps us in everything that we do. We read and listened to lots of stories about how Jesus revealed himself to others including his own disciples. We used a lot of drama to re-enact certain stories of the life and work of Jesus.

In P.E, we have been using apparatus to learn and practice sequences based on symmetry and balance. We then had to perform our sequences to the class.

This term we were also lucky to have Dave Rodgers from Worcester Warriors come down and teach us how to play tag-rugby.

In science we have been learning about the human body, including all the different organs the human body has and how it functions. One of our science lessons included an experiment based on the effect of sugary drinks and what it does to your teeth. We used eggs to replicate the enamel of our teeth and left them in 6 different sugary drinks over the weekend. When we came back we were horrified to see how the eggs had changed. We learned that vinegar is not very good for your teeth as it makes them very soft and orange juice and coca cola slowly chip away at the enamel on your teeth.
