

Autumn 1 in Robins

During this term Robin Class have been investigating Light. We have been using torches to see how light travels. We then tried to change the direction light travelled in by using mirrors. Other lessons have included making shadows, newton spinners and a periscope.

Our Art topic was to make a picture that included a sculpture of a moving person. This was created over several weeks by using wire, Modroc and paint to create the model.

Maths Club started for the Year 6 children. They spent their first lesson measuring angles using a protractor.

During RE, we have been thinking about Jesus as a miracle worker. The children had to imagine that no one had ever heard of Jesus and had to interview a person who had met him.
