

Autumn 2 Term in Penguin class

After finishing Cosmic (which we loved!) in English we continued the space theme and looked at the life of Katherine Johnson. She was an amazing, and very inspiring, mathematician who faced segregation and racism in the USA. She successfully became a mathematician for NASA and worked on the Apollo missions. We completed factfiles about her life.

In Science, we have been looking at (or listening to!) Sound. How it is made, what is vibration and how we detect it. We completed many experiments and enjoyed the topic.

We had a music day, when Mrs Bayliss was off, led by our music lead teacher Mrs Morgans.

In R.E, after studying All Saints and All Souls day we then looked at the followers of Christ. We looked at the Disciples and their stories and then moved on to looking at Advent and how we are preparing for the second coming of the Messiah.

After studying the Anglo Saxons we moved on chronologically to the Vikings. We learnt about what fantastic warriors and craftsmen they were. We looked at how they invaded Lindisfarne and settled throughout Britain: designing our own Viking homes and having a go at weaving too. We designed our own Viking shields and made them out of card, we were ready to take on anything!!

We were all very tired by the end of the term but looking forward to Christmas.
